Montserrat - www.fontsquirrel.com/fonts/montserrat

Source Sans Pro - www.fonts.google.com/specimen/Source+Sans+Pro

LAYERS

- Images
- Text
- Background

INDESIGN FILES

You will find 2 types of InDesign files: one with **.idml** extension (for version CS4) and one with **.indd** (for newer versions).

When editing you file, it will be easier to block or hide the layers you are not working on.

HOW TO REPLACE WITH YOUR IMAGES

Open the Layers panel. You will find a separate layer for your images.

Block or hide the shapes panel, these are the colored shapes that affect your photos.

With that layers blocked or hidden, you will see the grey placeholders where your image will go.

Simply drag and drop your image into the placeholder and it will be fit inside of it.

By double-clicking on it you can move, resize and rotate your image inside the placeholder.

HOW TO EASILY CHANGE THE COLORS

Open the Swatches panel. You will see every color used in the document.

Double click the color you want to change, and a color panel will open.

Choose the color you want, after that, every item in the document will be affected by this color.

HOW TO EDIT TEXTS

Remember to install the fonts used before opening the file.

After that you can change your texts easily just like in every other software.

Mock-ups and images are NOT included in the download files.
